

February 9, 2017

Dear valued customer,

LPKF would like to announce it will stop delivering current plastic depth limiters for ProtoMat S63 and ProtoMat S103 circuit board plotters.

In accordance with our constant struggles to always provide you with the best products and services possible, the plastic depth limiters for ProtoMat S63 and ProtoMat S103 have been replaced with a new generation almost one year ago.

Plastic depth limiter S63

Plastic depth limiter S103

The part numbers for the new aluminum depth limiters are:

10044564 Aluminum foot for S63

10041281 Air cushion foot aluminum for S103

Please note, that the new depth limiters have to be mounted to the new platforms only. To make the switch as simple as possible, upgrade kits have been prepared. The upgrade kit ATB consists of all necessary parts as well as instructions, and is available for both machine types.

The order codes for the upgrade kits are:

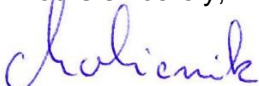

10041583 Upgrade kit ATB ProtoMat S63 with spring wire clamping

10041587 Upgrade kit ATB ProtoMat S103 with spring wire clamping

If your system still isn't prepared for the new aluminum depth limiter, please don't hesitate to order the upgrade kit soon.

We would also like to announce, that all our new systems, LPKF ProtoMat S63 from serial number 2624001089, and LPKF ProtoMat S103 from serial number 2524000525 onwards, and new heads are already equipped with the new aluminum depth limiters. Should you need any technical information, please feel free to contact the LPKF service.

Yours sincerely,

Darko Moličnik

Technical Product Manager ProtoMat
